ABOUT ME

Backend Developer with production experience building and maintaining Laravel-based systems serving over 75,000 registered users. Proficient in PHP (Laravel), NuxtJS, and TypeScript, with hands-on NestJS project experience. Experienced in AI-assisted development workflows using GitHub Copilot, Claude Code, and Gemini CLI to ship faster. Completed an international research internship at Yeungnam University, South Korea. Seeking remote backend or full-stack roles with Europe timezone overlap.

- Node.js
- REST API

EDUCATION

JULY 2021 – MARCH 2025

RAJAMANGALA UNIVERSITY OF TECHNOLOGY THANYABURI
Computer Engineering
2021 – 2025

WORK EXPERIENCE

Intern Researcher Assistant JULY 2024 – SEP 2024
YEUNGNAM UNIVERSITY, SOUTH KOREA

Conducted in-depth research and prepared detailed reports on the practical application of ROS (Robot Operating System) and YOLO (You Only Look Once), under the supervision of Assistant Professor Park Ji-hyuk. Contributed to various tasks including system performance analysis and computer vision solutions. Collaborated with university personnel and team members to ensure smooth project execution and supported the understanding and application of these technologies.

Backend Developer AUG 2025 – CURRENT
QUINTAURA CO., LTD., THAILAND

- Maintained and extended a Laravel-based backend for a Chinese astrology platform serving 75,000+ registered users, including ongoing development of a custom Filament PHP admin dashboard for managing complex niche data and feature configuration.
- Engineered subscription management system including billing logic and admin interfaces using Laravel and Filament PHP, enabling internal teams to manage user plans without developer intervention.
- Maintained and extended a Laravel-based internal workflow system, resolving bugs and delivering feature updates to meet evolving business requirements.
- Developing a CRM and doctor-scheduling prototype in Laravel and Filament PHP for MegaWecare, centralizing customer data and appointment workflows for a large-scale healthcare client.
